

Agency for museum climate and church heating

PHYSITEC is a building physics and systems engineering agency founded in 2007. The company is a spin-off originating from [Eindhoven University of Technology](#), group Physics of Monuments. By bringing knowledge developed within the university into practice, an effective utilization of scientific results is accomplished.

Mission

PHYSITEC is specialized in research and consultancy in the field of historic buildings. Examples are monuments with a museum function, churches or castles. Our ultimate goal is to contribute to the conservation of cultural heritage, regarding the building structure, valuable artifacts, energy use as well as comfort for occupants and visitors.
